

Owerview of Loyex Signal Program

1 September 2014

www.myloyex.com

Investment Strategy

Loyex Signal Program offers potentially very high investment returns for investors who are willing to take risk as well.

Open a Loyex account, and follow automatically the trades and success of the best FX traders worldwide! More than 1500 successful FX traders are available in the system based on their transparent past performance data, their signals.

Loyex Signal program chooses the top trading strategies based on pre-set criteria in order to help investors in their decision, but investors have the freedom to set up their own preferences at selection as well.

With a few clicks within the platform, the selected trader is visible, his performance can be tracked, and the investor can invest with him after deciding that his strategy fits the investors' preferences.

The average annualized performance of the top 7 traders by a selection of Loyex Signal Program as of 31 August 2014:

***Annual Equity Growth: 51% - 151%**
Maximum Drawdown: 3.62% - 28.54%

*Different traders have different length of history. The above data was calculated on a selected number of traders (see selection criteria on Signal Provider Program website) and on an average 50 weeks data. Equity growth data is annualized linearly. Drawdown is a measure of volatility (risk) showing that maximum fallback in value of the account during its lifetime. Signal Provider past performance is not indicative of future results. Investor returns may vary significantly from Signal Provider returns due to a number of elements, including trading fees.

Benefits of Loyex Signal Program

- Investors can participate in FX trading, even if they have no time to study the market in detail
- FX portfolios are managed by a professional Signal Provider chosen by investors
- It is a simple and ready-made solution, using MQL5 community site
- It offers support to avoid early trading losses
- The investor becomes part of a community of traders that are all working towards the same goal, and can choose among them now and then

How it works

1. Loyex Signals are only selected examples from a pool of more than 1500 signals. We invite you to explore other signals too and the whole MQL5 site!
2. Open your Loyex trading account and transfer money to it!
3. Register an account at www.mql5.com, the official community site of Metatrader users.
4. Login to your LOYEX Trading Station, go to Tools/Options/Community. Type in the login and password of your new MQL5 account. Now your Loyex platform and MQL5 account are linked.
5. Go to www.myloyex.com site and pick [Signal Program](#). Explore the available signals and select one, or choose a Signal directly through MQL5 site.

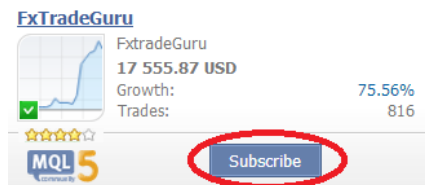

To learn more please visit <http://www.mql5.com/en/articles/523> or write to myloyex@loyalbank.com.

Key Features

- Potentially very high investment returns
- Low minimum initial investment of USD 1,000
- FX trades are automatically copied & filled on investors' Loyex trading account
- Easy subscription only with a few clicks
- Signals are selected from MQL5 website
- Only one signal at a time can be followed, but signals can be changed at any time
- Most traders are free of management charge
- Continuous 24hrs. operation is suggested for optimal results

The selected signals:

- Are examples from more than 1500 signals
- Express our preferences, but it is suggested that investors explore other signals even if not highlighted at Loyex
- Meet our selection criteria, but investors have the freedom to choose any other signal if more suitable
- Signal Program criteria
 - Signal is based on a real live trading account
 - Signal is free, but other high quality signals with low fee are also available at MQL5 site
 - At least 26 weeks trading history
 - The Maximum Drawdown is less than 30%
 - Signal is NOT averaging / martingale system
 - At least 1 subscriber

5. After selecting your Signal (e.g. FxTradeGuru) click „Subscribe” and you will be navigated to MQL5 site. Click Subscribe again, follow the steps, give your MQL5 password again and set the parameters and – you are now subscribed for the Signal!

Signal provider past performance is not indicative of future results. Investor returns may vary significantly from Signal provider returns due to a number of elements, including slippage, fees, broker spreads, market volatility, self-directed trading or customized account settings (such as maximum leverage or maximum allowed loss on Equity). Signal Providers may change their trading strategy at any time, without notice. Signals, offered for free can be withdrawn at any time by Signal Provider.
